

# Brass Half Round Trim

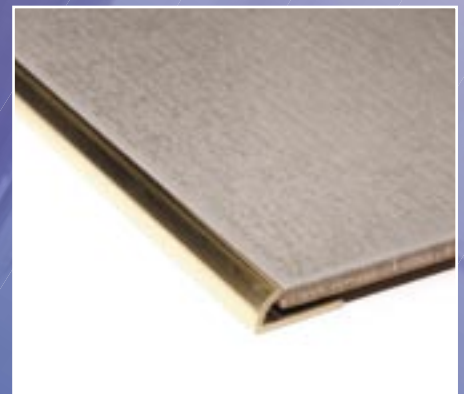

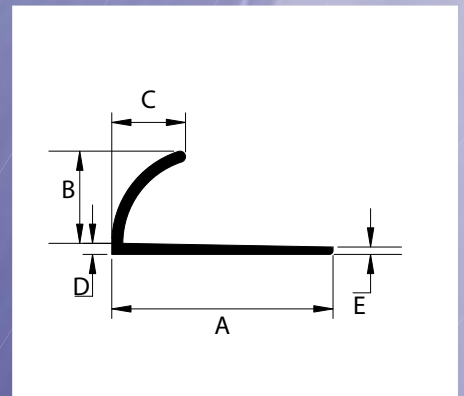

As already determined, the B.A.T. Half Round Trim could be considered the "jewel in B.A.T. TRIMS' crown" in regards to it's versatility.

Apart from being the most versatile type of trim on the market, the Half Round trim is also available in Brass; widely considered to be the most durable of all metals.

Brass is naturally more resilient to harsh installation environments, and is more resistant to chemicals.

In an effort to match existing chrome tap ware, the Brass Half Round Trim is also available in a chrome plated finish.

The variety of available trims and finishes within the B.A.T. Trims collection are designed to encourage specifiers and tiling contractors to consider tiling trim as being both decorative and functional.
