

Internal Corner

The Internal Corner Trim has been designed to provide the perfect finish in instances where tiles or any other surface finish join at a 90° angle, horizontally or vertically. The trim's primary purpose is to create an area which is easy to clean, however it also provides a solution to cracking grout within internal corners.

It is often difficult to grout an internal corner perfectly. The Internal Corner Trim can be used as an alternative, allowing tiles to be installed underneath the finishing lip – hiding unsightly cuts. The installation is then sealed with a silicone.

The Internal Corner is available in two sizes, as listed below.

Internal Corner - Available in 3m lengths					
B.A.T. Code:	A (mm)	B (mm)	C (mm)	D (mm)	E (mm)
BIC-8-3-	36.00	20.00	2.00	8.00	1.20
