

PVC Half Round Trim

The PVC Half Round Trim is designed for customers that are both price conscious, and those wanting to colour-match tiling installations closer to the type of tile being installed.

Where Aluminium, Brass, or Stainless Steel Half Rounds are installed to either offset a particular tile installation or to match items such as shower screens or tap fittings, the PVC Half Round offers a closer match to the tile.

B.A.T. TRIMS offers two different styles of PVC Half Round; the first quality – available in twelve different colours, as listed, and the Trade Quality Trim that is offered in two colours.

First Quality PVC Half Round is manufactured from guaranteed first quality virgin PVC, offering an unparalleled depth of colour and gloss, whereas the Trade Quality PVC is manufactured from recycled PVC, but nevertheless offers an overall attractive and glossy finish.

The PVC Half Round Trim is available in various sizes as illustrated.
